

Resurgam Angus

"The natural choice for grass-fed beef"

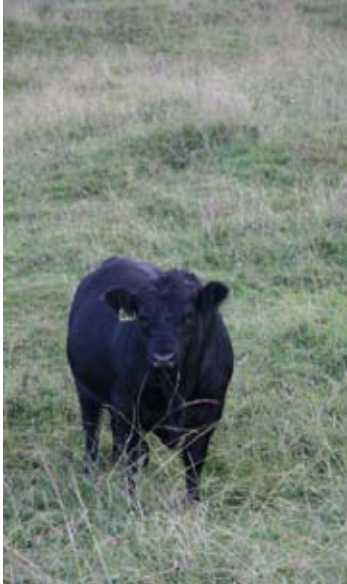

10th Annual Private Treaty Sale

Resurgam Ngahere U407

About Us

We are very pleased to have for sale by Private Treaty an even selection of bulls with fantastic temperament.

Over the past 19 years we have re-built a base of Pure New Zealand Aberdeen Angus maternal Genetics. These maternal genetics are renowned for their superior meat quality and easy doing ability. The cattle are great converters of lower quality grass to high quality beef; they maintain during feed shortages, they will bounce back from lost weight quickly.

Sean became interested in the Angus breed through his livestock role with AFFCO. In 1996 he introduced Aberdeen Angus cattle to Resurgam, the family farm.

While establishing the Resurgam Aberdeen Angus herd we discovered the unique quality of Pure New Zealand Angus cattle. These cattle have the attributes we believe are needed for New Zealand's grass based farming systems.

Background

The first six heifers were purchased at a bull sale from the Maunu and Taurikura herds in 1996.

We identified a number of bloodlines to incorporate into our herd. These included Matai 546, York of Kenhardt, Ramble of Kauere 175-5, Hingaia 469, Wharkowka Mate 544, Baxter of Matauri, and Puketutu bloodlines.

These carried the "Pure New Zealand" genetics that are traced to the original Scottish cattle which came to New Zealand from 1863 onwards.

In 1998 we started adding Pure NZ genetics to our program with the purchase of Waiwera Zeus I474. From 2000 we started adding females from Waimata Angus, Kenhardt, Waiwera Angus, Waitawheta Angus and the last Pure NZ cows out of the Waiterenui herd.

Foundation Sires used in our Herd:

Waiwera Zeus I474

Waimata Blu-print G436

Waimata Lad E230

Mainstream Mate 301 ET

Pinebank Waigroup 41/97

It is very satisfying to be using sons through to great grandsons from these key foundation sires within our herd.

In summary, our herd has grown over the past 19 years with our breeding programme aimed to preserve the unique qualities of the Pure New Zealand Aberdeen Angus cattle. It is our vision to produce moderate birth-weight calves, with strong maternal & paternal qualities, feed-efficient cattle with high meat quality. We seek longevity in our cows with easy fleshing in our herd and require minimum maintenance while working in a 100% grass based environment.

Waitangihia Station

On the 1st July 2009 we expanded our farming operation, taking over Waitangihia Station in Waikura Valley, Hicks Bay.

Waitangihia Station is 652 ha effective in area and is used for heifer development. The R2 Stud heifers are calved at the station where we evaluate their calves and select the best performing heifers to go into the stud herd. The R2 heifers receive their last drench as 2 year olds having calved. We also run a commercial herd of cows.

In December 2011 we moved down to the Waikura Valley and took a hands on interest in Waitangihia Station.

Over the past year we have included two neighbouring stations in our operations.

Bull Information

The R2 bulls are reared on the family farm - a beautiful emerald valley overlooking the Ohiwa Harbour in the Bay of Plenty. They are fed a high roughage grass diet which enables them to grow at a more consistent rate. We believe bulls in their natural conditions are more athletic on hill country and have increased fertility from less fat cells in their scrotum. It is very important that they perform from birth right through to breeding.

Our bulls have done well in a number of different farming environments throughout the North Island. The bulls available in this 10th Private Treaty Sale are bred on low fertility coastal country and receive minimal drenching.

Our aim is to build a strong natural immune system in our animals that forage on lower quality pasture and perform well when they leave the property. The main cow herd has not been drenched for 12 years and only receive an annual copper and B12 with selenium.

For sale this year we have 41 R2 Bulls. This line of bulls includes 36 that are suitable for heifer mating.

Jodi and I are confident about the future of our maternal Pure New Zealand Aberdeen Angus. We would like to thank you for considering our Resurgam Angus 2 year old bulls for your next breeding season.

We invite you to visit us at Resurgam and to see our sale bulls. Please phone for more information or further directions - we look forward to hearing from you.

What are Resurgam Aberdeen Angus Traits?

Fertility is number 1 in our rank of Importance

Other economic traits of importance are:

- Longevity
- Mothering ability (Maternal)
- Structural Soundness
- Easy doing ability
- Constitution
- Disposition (Temperament)
- Ability to adapt to a wide range of environments
- Breeder honesty
- Maintaining integrity of the herd
- Ability to convert lesser quality grass into high quality beef

If economic traits interest you as cattlemen / farmers be sure to make an appointment to view Resurgam Angus' Private Treaty Angus Bulls

You may wish to visit our website: **www.resurgamangus.com**, for updates and sale information.

Resurgam Angus: Your source of "Original Pure New Zealand Cattle" bred and proven in New Zealand's natural grass based farming systems.

Regards,
Sean, Jodi & Team Brosnahan

Terms and Conditions

HEALTH:

TB Status is C10 - the whole herd having tested clear on 12th May 2014.

All Bulls have been vet checked by Alan Fergusson of Edgecumbe Veterinary Centre, -certificates are available.

All Bulls Injected for BVD twice as a yearling with a booster shot as a 2 year old.

All Bulls have received a 10 in 1 injection.

INSPECTION:

Inspection of cattle can be arranged and is welcomed at the farm prior to the sale.

SIGHT UNSEEN:

Bulls can be selected sight unseen with a 100% satisfaction guarantee.

TRUCKING:

Resurgam Angus will assist in any way we can to keep transportation as cost effective as possible.

Vet's Comment

Incorporating

6th June 2015

To Whom It May Concern,

This is to certify that on the 26th May 2015 I examined 42 r2 Angus bulls on behalf of Mr S Brosnahan, Resurgam Angus, Wainui Rd., Ohope.

The bulls were identified by the following ear tags:

A2061	A2106	A1316	A1338
A2064	A2107	A1318	A1339
A2065	A2111	A1320	A1341
A2076	A2113	A1321	A1342
A2079	A2115	A1325	A1345
A2091	A2128	A1326	A1357
A2092	A2130	A1329	A1380
A2093	A2133	A1330	A1381
A2099	A2142	A1332	A1383
A2104	A2144	A1334	
A2105	A2149	A1335	

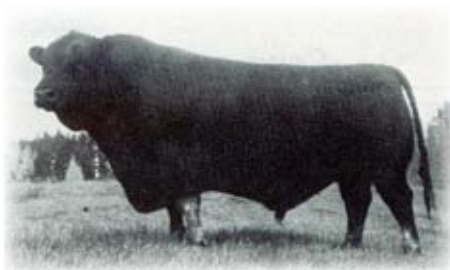

At the time of examination, these bulls were all in good health and condition. Scrotal palpation, scrotal circumference evaluations and visual examination of external genitalia all revealed no detectable abnormalities. It is recommended that these bulls be given a booster dose of either Bovilis or Hiprabovis BVD vaccine, prior to sale.

Yours sincerely

Kim Wiersma (BVSc)

Resurgam Blu-print T368 has Matai 546 in his pedigree 3 times. Matai 546 was a bloodline that we were looking for in our original heifers we purchased from Waimata Angus. His sire Resurgam Blu-print P215 is the heaviest bull calf we have reared to date out of a 14 year old cow. T368 grand dam is E1420 of Kenhardt, a donor and out the best Pure NZ cow family from Kenhardt. T368 has a lot of depth, width (possibly the widest based sire we have) with that great easy doing ability. T368's dam Waimata K1147 was the most direct link to Matai 546 in pedigree and typifies that quality of Matai cows that we found on our first visit to Waimata Angus. Resurgam Blu-print T368 was used on commercial cows in his first year of service at Waitangia Station and having seen his calves he was pulled into Stud duty this year. T368 is a bull who just keeps putting on condition. Blu-print T368 is a grandson of our foundation sire, Waimata Blu-print G436, who has left productive daughters that are doing a great job for us now.

Resurgam Craigievar U410 is sired by Resurgam Aspiration R232 out of a Waimata dam Waimata L1288. Waimata L1288 is also the dam of Waimata K818 who is the main herd sire at Aysgarth Angus in Te Awamutu. A well put together sire with a good topline and lots of natural thickness. Craigievar has 3 x Matai 546, Hingaia Tex x1, York of Kenhardt, Waimata E230. On the topside of the pedigree we also have Waimata K1167 a very productive cow. U410 is a lower birthweight sire.
