

Resurgam Angus R2 Bull Sale

28
Rising 2yr
Bulls

Private Treaty
at 386 Wainui Road, Ohope

Resurgam Angus – Welcome

We are very pleased to have for sale by Private Treaty an even selection of bulls with fantastic temperament.

While establishing the Resurgam Angus herd we discovered the unique quality of Pure New Zealand Aberdeen Angus Cattle. These cattle have the attributes we believe are needed for New Zealand's grass-based farming systems.

Our herd has grown over the past 25 years with our breeding programme aimed to preserve the unique qualities of the Pure NZ Aberdeen Angus cattle. It is our vision to produce moderate birth-weight calves, with strong maternal & paternal qualities, feed-efficient cattle with high meat quality. We seek longevity in our cows with easy fleshing and require minimum maintenance while working in a 100% grass based environment.

The R2 Heifers and cow herd are run at Waitangihia Station in the Waikura Valley, East Cape. The Heifers are evaluated and the best performing go into the stud herd. The R2 Heifers receive their last drench as a 2yr old having calved.

The 22-month old Stud Bulls are sent back to Sean's parents farm in Ohope where they are grown out on a 100% grass-based diet high in roughage for last couple of months. We believe bulls in their natural conditions are more athletic on hill country and have increased fertility from less fat cells in their scrotum. It is very important that they perform from birth right through to breeding.

Our aim is to build a strong natural immune system in our animals who forage on lower quality pasture and perform well when they leave the property. The main cow herd has

not been drenched for 17 years and only receive an annual copper and B12 with selenium.

For sale this year we have 28 R2 Bulls including 2-3 Keeper bulls for ourselves. This line of bulls includes 23 that are suitable for heifer mating.

Jodi and I are confident about the future of our maternal Pure New Zealand Aberdeen Angus. We would like to thank you for considering our Resurgam Angus 2yr old bulls for your next breeding season.

We invite you to visit us at Resurgam and to see our sale bulls. Please phone for more information or further directions – we look forward to seeing you soon.

TB Status C10 on both properties

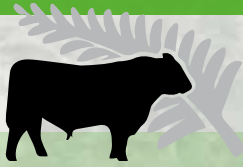

Special Note: All bulls have been

- Tagged and weighed at birth
- Vaccinated with Covexin 10 x 2
- BVD 2x vaccination as a yearling
- BVD booster shot as a 2yr old
- Copper injection
- B12 plus selenium injection
- Falkirk Structural Assessment x 3 – weaning, yearling, 18-20 month

Health & Safety note for 386 Wainui Rd

Please adhere to the Health & Safety guidelines at Resurgam Angus home farm at 386 Wainui Rd.

Beware of hazards on property and cattle yards.

Conditions of Sale

The sale will be conducted in accordance with Conditions of sale as set down by the New Zealand Stock and Station Agents Association: A copy of which will be exhibited at the sale.

Buyers are requested to leave their full address and specific delivery instructions with the booking clerk before leaving the sale.

Payment: Fourteen days after sale, unless prior arrangement has been made with the vendor.

Fertility Guarantee: As per rules and regulations set down by NZ Angus Cattle Breeders Association.

Health and Safety: Please adhere to the Health and Safety Guidelines at Resurgam Angus Home Farm, 386 Wainui Rd. Beware of hazards on property and sale venue

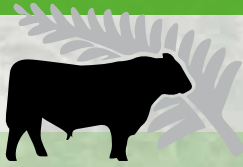

Insurance: We recommend purchasers insure their bulls with the auctioneer on sale day.

Special Note:

All Bulls in the Catalogue have been:

- Weighed, tagged and recorded at birth
- Vaccinated with Covexin 10 twice.
- BVD tested antigen clear.
- BVD vaccinated
- Copper injection
- B12 with Selenium injection

Falkirk Certification

The Falkirk System for animal selection was developed to ensure genetic integrity for commercial producers and astute breeders alike. Reasoned science and objective client data continue to confirm genetic gain of significant differential. The exact description of the physiology of a particular animal is defined by measured data. Then the Falkirk hand/eye methodology is applied to observe the skeletal/structural correctness that indicates and subscribes to functionality and longevity.

Feed conversion efficiency is the prime economic driver to determine the optimal animal. Which by default develops towards pre-potency with lower gas emissions through consuming up to 24% less feed than the inefficient animal. Environmental,

Marketing and financial fitness is assured with the Falkirk Certified stamp of approval.

Within any group of Falkirk assessed animals 3 categories are identified; Full Certification, Standard, Non Certified.

Due to the Resurgam Angus Stud following a rigorous genetic selection program over recent years all these bulls on offer today qualify either Falkirk Certified or Falkirk Standard to indicate reliable productivity and consistent replication of progeny.

Angus NZ EBV's Explained

TransTasman Angus Cattle Evaluation (TACE) EBVs and selection indexes remove the effects of non-genetic factors (e.g. feeding regimes, animal age) from what is seen and measured to provide the best measure of an animal's genetic merit. TACE information should always be used in conjunction with other selection criteria, including visual assessment.

A BEST PRACTICE GUIDE TO SELECTING YOUR NEXT ANGUS NEW ZEALAND SIRE

A TACE Guide to Animal Selection allows you to select the best genetics for your herd in four easy steps:

1. Identify the **Angus New Zealand selection index** of most relevance to you.
2. Rank animals using the chosen selection index.
3. Consider the individual EBVs of importance.
4. Consider other traits of importance (e.g. visual assessment).

The majority of these steps can be undertaken online, allowing you to generate a shortlist of bulls for potential purchase ahead of sale day. The searchable version of this catalogue can be found online here www.angusnz.com.

TRANSTASMAN ANGUS CATTLE EVALUATION

The Angus New Zealand Association publishes the following TACE EBVs and Selection Indexes. Please note that only EBVs from the same TACE analysis can be directly compared.

| Growth EBVs | Fertility & Birth EBVs | Carcase EBVs | Other EBVs | Selection Indexes |
|-------------------|------------------------|-------------------|------------|---|
| Birth Weight | Scrotal Size | Carcase Weight | Docility | Self Replacing |
| 200 Day Growth | Days to Calving | Eye Muscle Area | | AngusPure |
| 400 Day Weight | Gestation Length | Rib Fat | | Heifer Dairy Terminal |
| 600 Day Weight | Calving Ease Direct | Rump Fat | | Scan below for more detail |
| Milk (Maternal) | Calving Ease Daughters | Retail Beef Yield | |  |
| Mature Cow Weight | | Intramuscular Fat | | |

More information, including EBV descriptions and how to use them, can be found in the **Using & Understanding TACE EBVs** booklet. Scan the QR code for more details
<https://breedplan.une.edu.au/media/dtqpdm34/using-and-understanding-breedplan-ebvs.pdf>

Details about the Angus Selection indexes can be found at:
<https://breedplan.une.edu.au/media/bqjbnnbh/using-new-zealand-angus-selection-indexes.pdf>
